

HEAL YOUR HOME WITH HELITECH

Helitech has been and remains to be the industry leader in residential waterproofing and foundation repair solutions since 1987. While we have expanded into 4 states, we are still a family owned business that takes pride in providing long term, quality solutions to every homeowner. Over the years, varying soil conditions will affect the structural integrity of a house. Whether time is causing cracks to form, water leaking into your basement, or shifts in the foundation, we know that you want the job done right the first time. By choosing Helitech, we will ensure this is the only time you will have to fix the problem. We truly heal your home.

WATERPROOFING SOLUTIONS

Basement & Crawl Space Drain Systems

Helitech uses the patented Hydraway Drainage System to provide the ultimate protection against incoming water to your home. The Hydraway System removes up to 70% more water than conventional rock and pipe "drain-tile" systems and furthermore, it is guaranteed not to clog!

Sump Systems

Once drained, a sump pump is needed to push water up and out of your basement through the discharge hose. To handle even the most extreme situations, we offer the S1 Single, S2 Double (with battery back-up), and Super S3 Triple (with battery back-up + a 2nd standard pump).

Basement Wall Covering

The Hydrashield Wall Paneling System consists of rigid panels to brighten up your basement, transforming it into a functional living space.

Dehumidifiers

A dehumidifier is essential to maintain healthy air quality in your home as 50% of the air in your home comes up from your basement or crawlspace. Our Hydrabreeze system is application specific, available in two models, the Classic for Basements and Compact for Crawl Spaces.

Encapsulation

The Hydraliner Crawl Space Encapsulation System provides complete protection for humid crawl spaces. The Hydraliner System reduces the potential for mold to thrive in and around your home, leaving less allergens in the air.

Exterior Drainage

Exterior drainage is as important as interior systems. Helitech installs our patented Hydraway in yards for drainage, as well as Downspout Extensions, ensuring all rainwater is moved far enough away from your home to prevent further drainage issues.

SPECIALTY SOLUTIONS

Egress Window Wells Installation

Crawl Space Access Installation

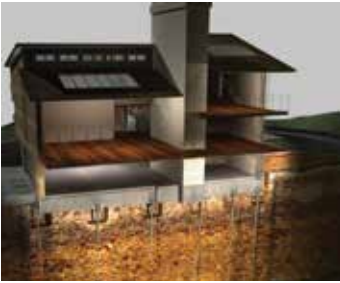

Floor Joist Replacement

Sill Plate Replacement

Band Board Repair

FOUNDATION REPAIR SOLUTIONS

Sinking Foundations

Helitech uses the AB Chance Helical & Atlas Resistance Underpinning (or Piering) Systems to stabilize and repair sinking foundations by transferring the weight of your home to more stable soil than the soil it is currently resting on.

Bowing & Leaning Walls

Concrete basement or crawlspace walls become stressed when there is significant pressure against them. Helitech utilizes the AB Chance Helical Wall Anchor System and Carbonbond Structural System as a reinforcement of concrete and block basement walls.

Floor Support

The HSC System (Helitech Support Column) replaces conventional concrete block, brick, and wood timber posts by providing superior support to existing beams and floor joists in your crawl space.

Wall Replacement

In the most severe cases, your foundation walls may need rebuilding. If a foundation wall is made of brick or in some cases, just too far gone, we will recommend rebuilding the foundation walls.

CONCRETE REPAIR SOLUTIONS

Concrete Leveling

Helitech utilizes a traditional concrete leveling process alongside a state-of-the-art technology to raise and level your existing concrete. Instead of breaking up, removing, and repouring the entire concrete slab, Helitech inserts a combination material below the surface to raise and level the sunken concrete.

Street Creep

Our Street Creep System is designed to relieve concrete street expansion pressure to your foundation.

Crack Injections

Our specially formulated crack repair injection system is designed to push water away and permanently restore structural strength to concrete. The use of our injection systems provide superior solutions to cracks in concrete basements, foundation walls, and structures.
