

Gutter System

Your home's water management system isn't complete without effective storm water drainage.

Insufficient exterior drainage can cause **interior water intrusion**, **organic growth**, and **damage to your home's foundation**.

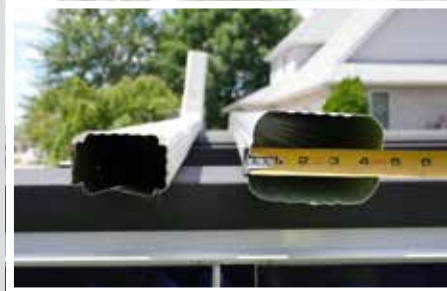

The Helitech Gutter System

The experts in water management, Helitech offers a complete gutter system designed to collect and carry storm water away from your home.

Gutters

Quality, 6-inch gutters efficiently collect rain and melting snow at a much higher capacity than standard gutters. This is especially important with higher pitched roofs or large surface areas.

Downspouts

Helitech uses the industry's largest downspouts to efficiently channel water away from your home faster than the standard size installed on most homes.

End Caps

Positioned at the end of a gutter run, these metal caps seal the gutter. They prevent leaks and ensures that water exits through the downspout.

Your Plan

Linear Feet Needed:

White

Black

Musket Brown

Sierra Clay

Almond

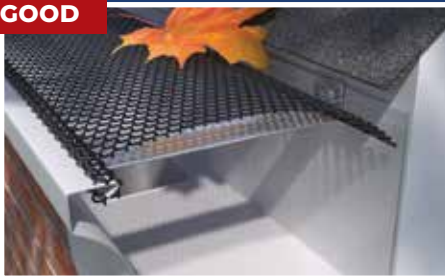

Charcoal Grey

Many additional colors available for special order.

Gutter Guards

Guards are an imperative piece of the gutter system to keep debris like leaves or pine needles and bird nests out of your gutters.

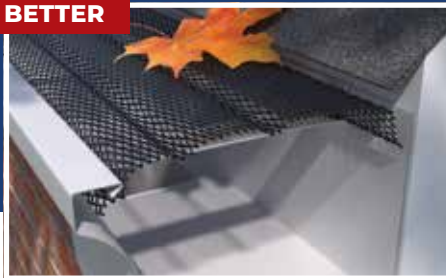

GOOD

Small Hole

Spring tension holds this versatile powder-coated steel gutter guard in place. Medium debris loads with small-sized holes. Powder-coated steel. 0.028 Expanded galvanized steel.

BETTER

Micro Mesh

Heaviest debris loads with the smallest possible holes. Locks into hidden hangers and does not disturb shingles. Powder-coated micro-mesh aluminum. Two center beads for added strength.

BEST

Extreme Mesh

Stainless-Steel Mesh (Surgical-Grade). Heavy-Duty Grade Aluminum Body. Durable Substrate Material. Handles up to 60 gallons of water per minute. Under-Shingle Mount or Fascia.

Linear Feet Needed:

Downspout Extensions

It is essential that the downspouts are extended a minimum of 10 feet away from your home's foundation in order to limit leaks and foundation issues. Based on terrain or city codes, your exit point will be:

Drywell

Lawnscape

Bubbler Pot

Daylight

Linear Feet Needed:

Gutter Cleaning Program

Our experienced team ensures your gutters and downspouts are free from debris, dirt, and leaves, preventing water damage and maintaining the integrity of your home.
