

Healing Homes Since 1987

Your home deserves a **solid foundation**. Grounded in faith, family, and a commitment to doing the job right, we've been helping homeowners protect what matters most since 1987. We provide permanent waterproofing and foundation repair solutions built to last for the life of your home — this is the Helitech Promise.

Waterproofing Solutions

Basement & Crawl Space Drainage Systems

Helitech utilizes the patented, American-made **HydraDry™ System** to provide the ultimate protection against incoming water to your home.

HydraDry™ removes up to 70% more water than conventional rock and pipe “drain-tile” systems. Furthermore, it is guaranteed not to clog!

Sump Pump Systems

Once drained, our sump pump system pushes water up and out of your basement through the discharge line.

To handle even the most extreme situations, we offer the **S1™ Single**, **S2™ Double** (with battery back-up), and **Super S3™ Triple** (with battery back-up + a 2nd standard pump).

Encapsulation

Our encapsulation offerings incorporate a series of products to establish a cleaner, more contained environment below your living space.

Products include **Encapsulation, Vapor Barrier, Dimpled Drainage Mat, Dehumidifiers, Soda Blasting,** and **Box Sill Spray Foam Insulation.**

Exterior Drainage

Our exterior waterproofing systems include **Yard Drainage Systems, Sump Pumps,** and **Foundation Membranes.**

Gutter Systems

Helitech offers **Gutters, Gutter Guards,** and **Downspout Extensions** systems as add-on products.

Foundation & Structural Solutions

Sinking Foundations

Helitech utilizes both **Helical** and **Resistance Piering Systems** to stabilize and repair sinking foundations by transferring the weight of your home to more stable soil than the soil it is currently resting on.

Bowing & Leaning Walls

Helitech offers various solutions for bowing and leaning walls, including **Helical Wall Anchors**, **Structural Beams**, and **Carbon Fiber Systems**. Each of these systems act as a reinforcement of both poured concrete and block basement walls.

Crack Repair

Our specially formulated **Crack Repair Injection System** is designed to push water away and permanently restore structural strength to concrete. Additionally, **Carbon Fiber** can be installed after injecting the cracks for further support.

Support Column System

Helitech's **Support Column System (HSC)** replaces conventional concrete block, brick and wood timber posts by providing superior support to existing beams and floor joists in your basement or crawl space.

Wall Replacement

In the most severe cases, your foundation walls may need rebuilding. If a foundation wall is made of brick or in some cases, just too far gone, we will recommend rebuilding the foundation walls.

Band Board & Sill Plate Repair

Band boards and sill plates are structural boards placed on the outside of your home behind your home's exterior covering. These boards can be prone to rotting and failure, which needs to be addressed immediately.

Exterior Solutions

Concrete Leveling

Helitech levels concrete with our **Polyurethane Injection System**, which is used to level your sidewalk, driveway, porch, patio, or pool apron. For concrete slabs that are too far gone, we also do **concrete removal and replacement**.

Street Creep

Our **Street Creep System** is designed to relieve concrete street expansion pressure to your foundation.

Access Windows

Helitech offers **Egress Windows & Wells** and **Crawl Space Access** installation to provide both entry and safe exit to a home's crawl space or basement.
